Taking Bearings — AI and Open Knowledge Production

An interconnected knowledge garden mapping the landscape of AI’s intersection with open scholarship, knowledge production, and social implications.

Garden Statistics

Metric	Count
Annotations	180
Concept Hubs	55
Cross-cutting Tensions	4
Domains	4
Annotation-to-Annotation Links	1339
Avg. Links per Annotation	7.4

Navigation

Core Documents

- [\[\[Analytical Introduction\]\]](#) — Central hub linking all 15 introduction sections with 51 cited annotations
- [\[\[Recommendations\]\]](#) — Areas for institutional action (full text from document)
- [\[\[Complete Alphabetical List of References\]\]](#) — Full bibliography
- [\[\[Citation Index\]\]](#) — Reverse index: which annotations are cited in which introduction sections

Explore by Structure

- [\[\[Conceptual Map\]\]](#) — Thematic overview of concepts and relationships
- [\[\[Concepts Glossary\]\]](#) — Comprehensive glossary of all key concepts
- [\[\[Index by Domain\]\]](#) — Browse annotations by knowledge domain
- [\[\[Index by Subdomain\]\]](#) — Browse by specific topic area
- [\[\[Index by Tension\]\]](#) — Explore cross-cutting tensions

- [\[\[Index by Author\]\]](#) — Find annotations by author
- [\[\[Index by Methodology\]\]](#) — Browse by research methodology

Four Domains

- [\[\[Essential Contexts\]\]](#) — Histories, theories, and foundations of AI
- [\[\[AI and Scholarship\]\]](#) — AI's impact on scholarly practices
- [\[\[AI and Social\]\]](#) — Social implications and critical perspectives
- [\[\[AI and Open\]\]](#) — Intersection of AI and open knowledge movements

Four Cross-Cutting Tensions

- [\[\[Openness vs Enclosure\]\]](#) — Open knowledge vs proprietary control
- [\[\[Efficiency vs Process\]\]](#) — Speed of AI vs careful scholarship
- [\[\[Technical Capability vs Organizational Capacity\]\]](#) — What AI can do vs what institutions can support
- [\[\[Operational Assistance vs Epistemic Authority\]\]](#) — AI as tool vs AI as knowledge authority

Concept Hubs

Browse the **55 concept hub notes** in the [01-Concepts/](#) folder. Each hub connects all annotations discussing a specific concept.

How to Navigate

1. **Graph View:** Open the graph view to see the full network of connections
 2. **Backlinks:** Each note shows all notes that link to it
 3. **Tags:** Use tags panel to filter by methodology, topic, stakeholder, or region
 4. **Search:** Full-text search across all annotations
 5. **Concept Hubs:** Start from a concept to find all related annotations
